

Bata Inc, a therapist owned and operated agency, established more than 20 years ago, provides Occupational, Physical and Speech Therapy Services, Special Instruction and Autism/Behavioral Services to the pediatric population – from infancy through young adulthood.

Our fully licensed and certified providers receive ongoing supervision and mentoring, and our office staff is there to provide support for our practitioners and case-management for our families. Each client is provided with personalized attention.

We provide Early Intervention services in a number of New Jersey counties, including Camden and Burlington counties. Our dedicated staff have been trained to work with families from diverse cultural and socio-economic backgrounds whose children's developmental delays vary in severity.

At Bata we are very much one big family/team – the REICs, the service coordinators, our providers and the families we service are all members of our 'club'. We try to ensure that we provide the very best level of service whilst adhering to the mission statement and policies and procedures of the New Jersey Early Intervention system.
